LOKESHVARI S

Mobile: +91 8667349694 | Email: slokeshvari12 | LinkedIn: lokeshvari-s | GitHub: github.com/Lokeshvari22

PROFILE SUMMARY

inal-year B.Tech Information Technology student with hands-on experience in AI/ML and web development. Completed a research internship in image classification at NIT Puducherry, gaining practical exposure to CNN and EfficientNet architectures. Skilled in Python, and MySQL, with ongoing full-stack development training. Experienced in building real-world, data-driven applications. Passionate about developing intelligent systems and solving practical problems through technology.

EDUCATION

B.Tech in Information Technology July 2022 – May 2026
Perunthalaivar Kamarajar Institute of Engineering and Technology, Karaikal
CGPA: 8.58 (up to 7th Semester)

HSC (Higher Secondary Certificate) June 2021 – August 2022
Annai Teresa Government Girls Higher Secondary School, Karaikal
Score: 83.33%

SSLC (Secondary School Leaving Certificate) June 2019 – August 2020
Murugathal Aachi Government Girls High School, Karaikal
Score: 79.4%

TECHNICAL SKILLS

Programming Languages: Python, Java (Basic), C (Basic)
Web Development: Django, HTML, CSS (Basic), JavaScript (Basic)
Artificial Intelligence & Machine Learning: Deep Learning, CNN, EfficientNet, Image Classification, Feature Extraction
Database: MySQL
Tools & Other: Git, GitHub, VS Code, Canva

WORK EXPERIENCE

AI-Based Image Classification Intern – NIT Puducherry June 2025 – July 2025

- Worked on an image classification task to distinguish oral cancer images from normal images using deep learning techniques.
- Studied and implemented CNN architecture for feature extraction from medical images.
- Explored EfficientNet to improve classification accuracy with fewer parameters.

PROJECTS

Price Comparison Website | May 2025

- Developed a Django-based price comparison web application to extract and display product data from multiple e-commerce sources.
- Implemented product matching logic using name similarity algorithms.
- Worked on image-based product comparison logic and designed a responsive UI using HTML and CSS.

Technologies: Python, Django, HTML, CSS, MySQL

CERTIFICATIONS

Developing Soft Skills and Personality – NPTEL Aug 2024 – Oct 2024

- Completed structured training in communication, interpersonal skills, teamwork, and professional personality development.

Effective Writing – NPTEL Jan 2025 – Mar 2025

- Completed training in written communication, clarity, professional writing, business writing, and idea organization.

Ultimate Beginner's JavaScript Course – Learnz Development Hub September 2025

- Gained foundational JavaScript knowledge including variables, functions, DOM basics, and scripting fundamentals.

MySQL – Datapencil February 2026

- Completed MySQL course; built an Online Food Delivery Analytics System using joins, CTEs, procedures, and triggers.
- Analyzed revenue, customer behavior, and delivery performance; designed and optimized relational database schema with indexing.

CURRENT LEARNING

WordPress & Full Stack Development – RBV Golden Era Evolution Pvt. Ltd. Feb 2026 – Present

- Undergoing structured training in WordPress and full-stack web development, covering UI design and modern web workflows.
- Gaining practical exposure to front-end and back-end integration concepts.
